

**Dharitri** *Regenerative Farming Meets Blockchain*

# Project Dharitri

A movement to empower farmers and restore our planet.

[www.dharitri.org](http://www.dharitri.org)

Where every seed you support grows into a greener future.

# What is Project Dharitri?

Dharitri means “**Mother Earth**”, a movement that combines technology, sustainability, and community to help farmers and heal our planet.

## Core Values:

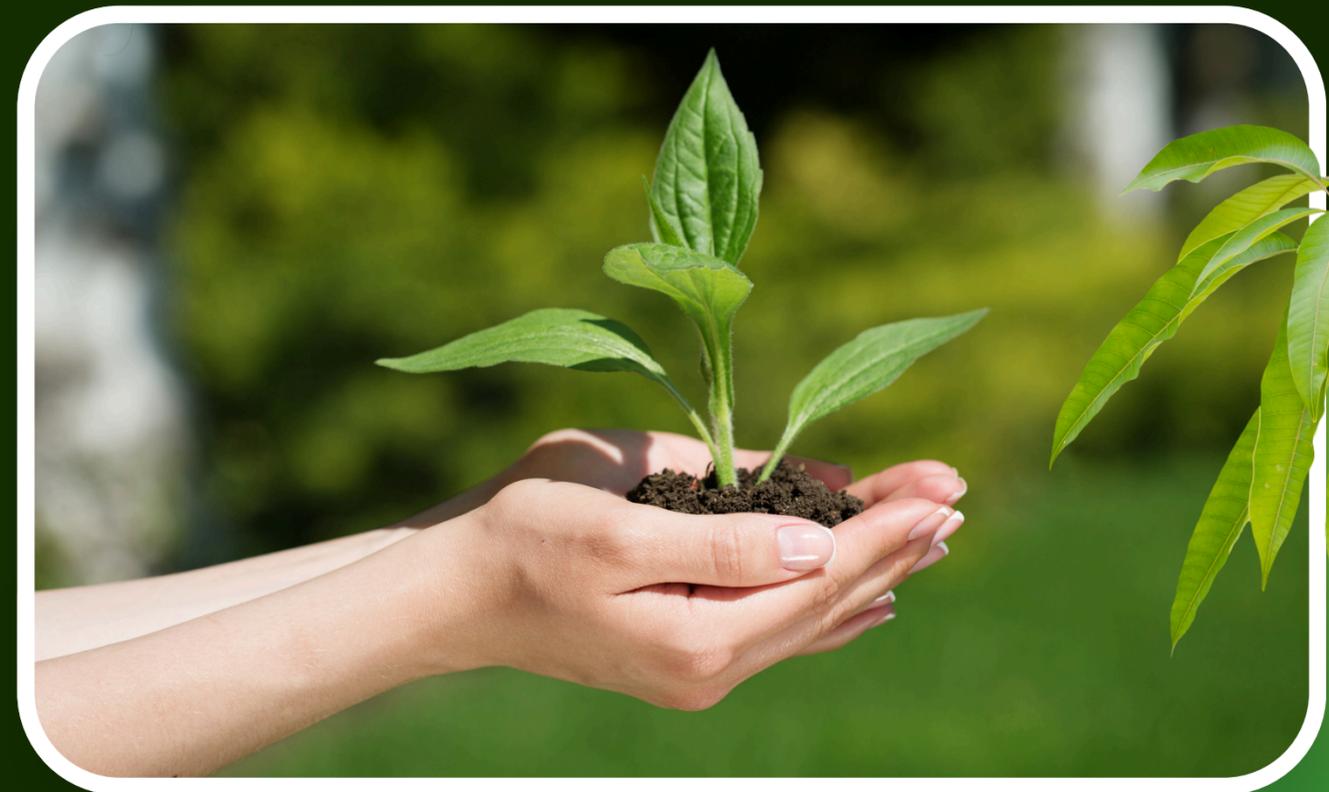

Transparency | Sustainability | Empowerment

[TO LEARN MORE VISIT OUR WEBSITE](#)

## OUR MISSION IS SIMPLE

To empower farmers with fair financing, transparent tracking, and rewards for regenerative agriculture using the power of blockchain.

## How Dharitri Connects Farmers?

We help farmers thrive through:

- **Micro-Loans:** Affordable funding for seeds, irrigation, and equipment.
- **Digital Wallets:** Each farmer receives a digital profile and gets a blockchain wallet for secure funds and transparent repayments.
- **Farming Activity Logs:** Farmers or field partners upload updates (photos, yields, GPS data) creating verifiable proof of progress.
- **Harvest & Sales:** Buyers can scan a QR code on the product (like honey or mushrooms) to see exactly which farm it came from and its sustainability score.
- **Token Rewards:** Every completed milestone automatically triggers REWA token rewards also traceable on-chain.

**All interactions are recorded on blockchain for trust, traceability, and fairness.**

# Our Pilot Project

We have 10 acre farms in different ecological zones in Kenya, focusing on:

Organic mushroom  
cultivation

Beekeeping and  
honey production

Regenerative  
Agriculture

Water storage systems  
for drought resilience

This pilot proves how blockchain-backed microloans and sustainability tracking can change lives and restore ecosystems.

# What is pREWA and REWA?

pREWA and REWA are Dharitri's tokens that power the ecosystem.

- **pREWA (Interim Token):** Runs on Binance Smart Chain. Used for pilot testing, staking, and community engagement.
- **REWA (Native Token):** REWA is Dharitri's Native token, Will launch on Dharitri's own blockchain. Powers loans, staking, donations, and eco-product trading.

[Buy pREWA](#)

*Every token you buy or stake supports real farmers and tangible regenerative projects.*

# How You Can Help?

## Project Dharitri welcomes everyone:

- Individuals, organizations, and communities ,to take part in restoring our planet through farming.

## Support Through Private Sales:

- You can participate in private token sales (pREWA/REWA) to help fund farmer projects and soil restoration.
- Your contribution is recorded on blockchain, creating a direct link between your investment and real-world impact.

# How You Can Help?

## Sponsoring a Project:

- Adopt a farm, fund a beekeeping kit, or build a water storage tank.
- Every project you support is visible and traceable, so you can see the change you create.

## Stake & Earn:

- Stake your tokens to strengthen the Dharitri ecosystem.
- As the network grows, you earn rewards while empowering farmers and promoting sustainability.

## Spread the Word:

- Share Dharitri's mission on social media, in your community, or among organizations that value ethical, regenerative growth.

# Together We Grow

Every action, whether you invest, donate, or share, helps a farmer grow food, restores nature, and strengthens a transparent global community.
